See revised entry below.

SPIKE DRILLING TANK BATTERY OIL SPILL RESPONSE, DAMON, FORT BEND COUNTY, TEXAS:

On June 9, 2017, EPA was notified by a Texas Parks & Wildlife Game Warden of an oil discharge in Fort Bend County. The discharge of 130 barrels (bbls) of oil and 130 bbls of produced water was reported to have occurred Sunday, June 4, 2017 in Fort Bend. Over five miles of Cow Creek, a tributary of the Brazos River, was impacted. Spike Drilling is reported as the Responsible Party (RP). The discharge was not reported to the National Response Center (NRC). The spill occurred through a failed fitting on the bottom of one of the produced water tanks. The tank battery consists of four tanks, two produced water and two oil tanks and does not appear to have secondary containment. Emergency Management Branch (EMB) staff provided oversight of the RP's response activities. Additionally, EMB staff coordinated with the Texas Railroad Commission, Texas Department of Parks and Wildlife, Fort Bend County Emergency Management, Fort Bend County Water District and property owners. The cleanup was completed on Tuesday June 13, 2017. EMB staff will conduct a final walk through in late June 2017. (Carroll, x2220)

The Spike Drilling entry needs an explanation of what we did, not just a description of the problem. If Craig cannot get the additional information to you today, then remove the entry for this week. Rest of WAR is ok to go.
